Education

San Francisco State University

BS IN COMPUTER SCIENCE

GPA : 3.8

San Francisco, CA

Aug 2018 – Present

(Expected Graduation - May 2022)

Projects

Wildfire Tracker

- A React Web Application created to track real-time wildfires around the globe.
- It uses the NASA Open API and the Google Maps API.

JavaScript, React, HTML, CSS, NASA API

<https://burmy.github.io/Wildfire-tracker>

Crypto Currency Tracker

- Crypto Currency Finance Price Tracker App made using Hooks and Axios, and powered by CoinGecko API.
- Users are able to search currencies and have it display on the browser.
- Also, the prices will update live whenever you refresh the page.

JavaScript, React, HTML, CSS

SF Hacks Website

- This SF Hacks website I redesigned during SF Hacks 2021.
- Designed and developed the responsive website from the scratch using components from my own projects and some provided by the SF Hacks team.
- Project earned “Best Website Redesign” award at SF Hacks 2021.

JavaScript, React, HTML, CSS

<https://burmy.github.io/sfhacks>

Face Detecting AI

- A website that detects faces from images taken anywhere from the internet.
- Allows users to Sign In and Registers new users using PostgreSQL.
- It uses a Machine Learning API from Clarifai.
- This project was a part of a Udemy course I took during the summer of 2020.

JavaScript, React, HTML, CSS
