## Education

---

### San Francisco State University

BS in Computer Science

GPA: 3.8

San Francisco, CA

Aug 2018 – Present

(Expected Graduation - May 2022)

## Work Experience

---

### SF Hacks @ SFSU

Web Developer and Organizer

June 2021 - Present

Remote

- Organizing one of the biggest Hackathons in the Bay Area.
- Maintaining the official SF Hacks website with technologies like React.js.

### Bluload

Front-end Developer Intern

June 2021 - August 2021

Remote

- Bluload is an client booking and follow-up system designed for simplicity. It lets its users to schedule meetings easily and efficiently while staying organized all in one place.
- Designed and developed the website (bluload.com), including the profile dashboard of the user.

## Projects

---

### RUMI - Room and Roommate Finding App

React.js, Express.js, MySQL, Firebase

<https://18.190.48.206>

- As a Front-end lead in a team of 6 members, I designed and developed this web-based application which helps its users find rooms and roommates around the Bay Area.
- Offers a real-time chat experience for users using Google Firebase and is deployed with AWS.

### Pixis - Photo Sharing App

JavaScript, Handlebars, HTML, CSS

<https://github.com/Burmy/photo-app>

- This is a photo management website that allows users to post images, search for images and view and comment on individual image posts.
- This was made for the final project for web development class at SFSU (CSC 317).

### Netflix Repos Finder

JavaScript, HTML, CSS

<https://burmy.github.io/netflix-repo-app>

- This is a simple Netflix repositories searching app.
- Search any Netflix repository where each repository contains the information about the recent commits made to the repository.
