Education

San Francisco State University   San Francisco, CA
BS in Computer Science   Aug 2018 – May 2022
GPA : 3.8

Work Experience

Cognizant   August 2022 - Present
Front-end Developer   Dallas, TX

- Worked on an internal dashboard web application for an in-house projects database using React for front-end.
- Built an in-house web application using Angular for front-end, coupled with Spring Boot for backend, and skillfully connected to a MySQL database.
- Utilized AWS to establish CI/CD pipelines for Angular and Spring Boot.
- Orchestrated deployment of SPA app to S3 and Spring Boot onto Elastic Beanstalk.

SF Hacks @ SFSU   June 2021 - June 2022
Web Developer and Organizer   San Francisco, CA

- Organized one of the biggest Hackathons in the Bay Area.
- Maintained the official SF Hacks website with technologies like React.

Bluload   June 2021 - August 2021
Front-end Developer Intern   Remote

- Designed and developed a fully functional website (bluload.com) using React framework.
- Contributed to the development of the profile dashboard of the website.

Projects

RUMI - Room and Roommate Finding App   React.js, Express.js, MySQL, Firebase
                                                                        https://github.com/Burmy/RUMI

- As a Front-end lead in a team of 6 members, I designed and developed this web-based application which helps its users find rooms and roommates around the Bay Area.
- Offers a real-time chat experience for users using Google Firebase and is deployed with AWS.

Pixis - Photo Sharing App   JavaScript, Handlebars, HTML, CSS
                                                                        https://github.com/Burmy/photo-app

- A photo management website that allows users to post, search for images and view and comment on individual image posts.

Awards

SF Hacks - Best Website Redesign

- Won a Web Competition at SF Hacks 2021 for the best website redesign.
